A Daily Situation

The delivery dates are pushing, 2 employees are on vacation and the CNC machines still have to produce as efficiently as possible. You can not afford downtimes. No problem, with the tried-and-tested BWTCompact presetting device, every employee, including temporary staff, can quickly and precisely measure the tools, thus keeping makeready times as short as possible.

Focus your highly qualified employees on the production and make your non-productive times independent

Advantages of BWT Tool Presetters

Fast, easy measuring

High precision

No training required, also suitable for temporary staff

Safety through proven Mitutoyo measuring system

Precise bearing tool holder

Sturdy anodized aluminum body modular design

Optimal price performance ratio

BWTCompact

BWT Tool Presetters

BWTCompact

■ The tool presetter BWTCompact impresses with its extremely easy handling. The practice-oriented functionality guarantees a fast and accurate measuring of tools. Technical details as well as the 2D-button, drive via the handwheels and a delicate adjustment in both axes, save precious time during the presetting.

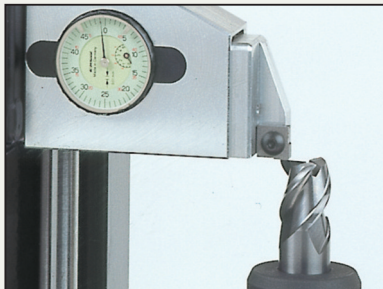

The BWTCompact also offers an optimal price performance ratio with its unique design.

Easy operation via handwheel with delicate adjustment.

Proven measuring system from Mitutoyo with digital data output.

Precise measuring with 2D-buttons. 90 ° indexing on the take-up spindle (optional).

Technical Specifications

	BWT-A	BWT-C
Tool Holder	SK40	SK50
Max Concentricity at the height of 200 mm	0.02mm	0.02mm
Max Deviation of Parallelismus to tool axis	0.02mm	0.02mm
Max. Setting Height	300mm	400mm
Max. Setting Diameter	230mm	300mm
Digital measured value display	0.01mm	0.01mm

Measurements and Weight

Length	400mm	500mm
Width	180mm	180mm
Height	580mm	780mm
Weight	26.5kg	29kg
