

# CustomGO

## The access management system for Cathedral and Churches

### Continuous measurement of the number of people

Light barrier measurement shows all the time how many people are currently inside.

### Automation of incoming guests control

A display at the entrance signals whether access is permitted.

### Passage width

The passage width is variable from 0.50 m to 2.00 m.

### Optional:

**Additional Brackets**  
**Information Sign / Additional Screen**  
**Customer Branding Possible (OEM)**  
**Barrier Chains**
